II. Actual Growth in Demand (C)

Actual Growth in Demand Year 2006 – The actual system demand growth (weather corrected) from system peak 2005 to system peak 2006 was 304,000 kW. This growth is net of 7 % T&D line losses.

Note:

- (1) The demand growth figures in this report represent the growth in system-wide demand at the customer meter. Customer load growth values have been derived by adjusting system demand to reflect estimated line losses of 7%.
